AI-Reasoning — Database V2 Modernization Cycle (officialboomi-X3979C-dbv2da-prod)

 **1. Connection Modernization**
Convert Legacy JDBC Settings
officialboomi-X3979C-dbv2da-prod
Host, Port, DB, User credentials

 **2. Profile → JSON Synthesis**
profile.db → JSON Profiles
JSONRootValue > Object > Entries
Nullable & DataType mapping

 **3. Operation Assembly**
GenericOperationConfig & objectTypeId
Link Req & Resp JSON Profiles
Custom SQL Query / SP configuration

**DB V2
ENGINE**

 **6. Process Shape Re-Wiring**
Rewire <connectoraction> Shapes
Set dbv2da-prod action type
Psiog Peer Review Standards

 **5. Map Shape Re-Wiring**
Swap fromProfile / toProfile to JSON
Remap field keys & key paths
Retain user functions & lookups

 **4. Dynamic SQL Synthesis**
Prepared Statements & WHERE Logic
Conditions: =, <>, >, <, LIKE
Parameter binding & Type casting
